In brief

Moving to a new home can be challenging and overwhelming, especially if you don't know what to do from the beginning. Fortunately, with the advent of applications and other modern innovations these days, you can make the process of relocation much more convenient and faster.

Moving to a new home can be challenging and overwhelming, especially if you don't know what to do from the beginning. Fortunately, with the advent of applications and other modern innovations these days, you can make the process of relocation much more convenient and faster. Thus, if you're moving anytime soon, below are the six apps that can help manage the transition more efficiently:

1. MoveAdvisor

When it comes to moving, the organization plays a important role in the success of the whole process. Thanks to MoveAdvisor because it allows you to get organized and keep track of all the things that need to be done from start to finish. With this moving app, you can take advantage of the weekly moving timeline that can help you stay on top of your relocation tasks and a home inventory feature that lets you track all your possessions during the move. Apart from organization tasks, MoveAdvisor is also known for helping you find NYC Movers or wherever you may be, for your relocation. For instance, you can use this app to read reviews about different moving companies as well as obtain moving quotes. Therefore, if you need professional help, this app can be your partner in finding the right one for your needs.

2. Let Go

Moving can be your opportunity to declutter and get rid of all excess items before the move. But, if you're wondering what you should do with all the unnecessary stuff, then, you may consider putting the Let Go app into use. This moving application is a free marketplace for both sellers and buyers. Instead of holding a garage sale in front of your house, you can use this app to make the selling process much easier. To get started with Let Go, all you need to do is take photos of the items and post them to the platform along with a description and price. From there, you just wait until potential buyers will contact for a potential sale. Using the app for getting rid of all unnecessary items can be a great way to make money off the things you don't want to bring with you.

3. Sortly

Typically, packing and sorting of belongings can be one of the moving tasks you can't avoid. Whether you're moving locally or internationally, you need to pack all your stuff before the big day. Therefore, if you want to be a pro in this field, you may want to use the Sortly app to make your life much easier. This moving app allows you to capture photos of your things and come up with a visual inventory of them. Using the app's features, you can now categorize your stuff by room, location, value, condition, or whatever method you like. Moreover, Sortly also provides you with a moving checklist which you can use to keep track of all your relocation tasks.

4. MagicPlan

Another essential moving app to consider is MagicPlan. If you want to prepare your new home for your upcoming relocation, this app can do the job for you. It comes with innovative features that allow you to plan your furniture arrangement and create and import floor plans. Instead of taking the measurements and trying to remember the figures, using MagicPlan lets you have every piece of information at your fingertips.

5. TaskRabbit

Aside from packing, moving to Manhattan, or wherever you may be, is also about doing some handyman work in your new home. After all, you surely don't want to arrive in your new place without getting things done ahead of time. To make sure your new home is ready for your arrival, you can use TaskRabbit to help you find the right professionals for the handyman projects. For example, if you need help with painting, cleaning, and other small home upgrades, this app can be of great help to you. They'll match you with the appropriate people who can take care of the job for you. This will allow you to turn your new place into a livable dwelling before your moving day.

6. Trulia

If you're in the process of looking for a new place to move in, using the Trulia app can be an excellent idea. It comes with local insights, house recommendations, and map overlays that can help you find the perfect place to live in. Thus, if you want to get the right house to relocate to, Trulia will help you check off this task on your moving checklist.

Bottom Line

Again, moving can be complicated and confusing. But, with the moving apps mentioned above, it's clear how modern technology can help you get organized before, during, and after the relocation. Instead of doing all the things by yourself, install these applications to help you manage the entire moving process. All these apps can be downloaded using either Android and iOS operating systems.
