### In brief

In iOS 6.0 UILabel supports NSAttributedString, which can be used to underline a Label Programatically.

In iOS 6.0 UILabel supports NSAttributedString, which can be used to underline a Label Programatically.

Use the below code to add underline to a label

```
NSMutableAttributedString *attributeString = [[NSMutableAttributedString alloc] initWithString:@"This is an underlined text"];  
[attributeString addAttribute:NSUnderlineStyleAttributeName  
value:[NSNumber numberWithInt:1]  
range:(NSRange){0,[attributeString length]}];
```

Now assign the attribute to the label

```
yourLabel.attributedText = [attributeString copy];
```
