In brief

Are you looking for genuine and reliable software that can convert audio into a binaural stereo for your PC headphones? If yes is your answer, then you should download and install Ashampoo Soundstage 2020 right now.

Are you looking for genuine and reliable software that can convert audio into a binaural stereo for your PC headphones? If yes is your answer, then you should download and install Ashampoo Soundstage 2020 right now. This software helps in converting existing 5.1, 6.1, and 7.1 into binaural stereo easily and sends it to your headphones so that you would be able to enjoy a better surround experience without using any hardware. Users can experience the rich audio of a dedicated sound system through surround sound for headphones. Play games, listen to music, and watch favorite movies and hear the best sound instantly without compromising on anything.

With the help of this software, you can turn your PC into a 3D sound system. There is a gaming-friendly mode which helps in adding spaciousness to sounds and helps in catching enemies faster without adulterating the real audio. The user interface is simple and easy to understand for everyone. Even if you are using it for the first time, you would not face any issues while using this great software for sure.

Features of Ashampoo Soundstage 2020

- Surround sound for headphones
- Customizable room settings
- Volume boost
- Choice of sound locations
- Built-in equalizer
- A virtual sound card on your PC
- Real gaming experience
- Spacious stereo sound
- Audio formats: Stereo, 5.1, 6.1, 7.1

Ashampoo Soundstage 2020 works on the major Windows OS which includes Windows 10, Windows 7, and Windows 8. This great tool has a virtual sound card which is always located on your real sound card of your PC and the headphones. There is no need to look for audio hardware as the altered signal will be transferred directly to your headphones for the best surround experience for sure. It has an easy mode which can add sound space which would be very helpful while playing video games as it can easily detect your enemies.

If you want to amplify the additional signal and increase the sound volume of your PC, then you can take the help of the "Boost" tool. After activating it, you would get a warning panel which informs that the computer volume will increase significantly. You would enjoy the best quality sound even when played on lower quality sound systems. The full version of Ashampoo Soundstage 2020 is available at \$39.99. There is no trial version available and you need to go for the paid version only for using it.

Conclusion

Ashampoo Soundstage 2020 is the best software to enjoy surround sound on your PC. No need to buy an expensive sound system anymore and better to use this software for all your music needs. You would be able to experience an immersive surround system through your regular headphones easily without any hassle for sure. It offers several helpful features and benefits to users worldwide. It has an incredible interface that will make your music experience better on your PC headphones.

Just use it and enjoy listening to your favorite music right now!
