You can find tons of streaming devices available in the market such as Roku, Fire TV, Apple TV, and even Amazon Fire TV. There are millions of people all around the world prefer using these streaming devices due to its great benefits and features to the users. A TV box is a small electronic device that helps to connect to your TV, transforming into a Smart TV without any issues at all. You would be able to expand the capabilities of your TV with the help of using a TV box for sure. If you are looking for a reliable and genuine TV box in the coming days, then it is right to consider Android TV Box without any second thought. Android is a prime multimedia field and even supports full popular apps for streaming TV, music, and famous movies. With so many options available in the market for users worldwide, it becomes difficult for users to choose a reliable and genuine one. You might be confused with choosing the best Android TV Box for your overall requirements. If yes, then you should not worry about it at all. Here you would come to know about the best Android TV Box for 2020 you should be aware of.

Nvidia Shield TV Pro

Nvidia Shield TV Pro is one of the famous and genuine Android TV Box for 2020 available in the market for the users. If you are searching for a perfect way to connect your computer gaming with your Smart TV, then it is the right time to consider Nvidia Shield TV Pro without any second thought. You should note this affordable and well known Android TV Box uses GPU and its potent wireless connection to your cast your computer gaming to the TV screen. There is no need for any hardware connection and you would be able to play easily without any problem. It has power Nvidia Tegra X1+ processor, Wi-Fi, Ethernet, 16 GB internal storage, 3G RAM, and also great for game streaming, emulation, and native Android gaming. It would be better for you to understand that 3GB of RAM provides plenty of speed and an incredible 500 GB of storage that leaves other TV boxes behind. There is no MicroSD card slot which means that you would not be able to expand the storage capacity. It lacks HDR10+ and users cannot do HDR for YouTube. The Shield TV Pro is compatible with the Google SmartThings smart hub assistant, connecting your television box with your smart hub, offering a great interface with all of your smart devices, and making it better to control your sweet home.

GooBang Doo ABOX A1

GooBang Doo ABOX A1 is also one of the famous and trustworthy Android TV Box for 2020. One of the most important features to note is the OS, and the ABOX is fully loaded with the latest Android operating system. You should note that it also supports native 4K resolution and mainly outfitted with a 3D graphics accelerator which means you are going to have a better viewing experience for sure. It is an affordable Android TV box for 2020 which you should consider if you are having a tight budget. It is powered by a 2.0 GHz quad-core processor, with a 750 MHZ GPU to assist with 3D graphics acceleration. Users will experience the best performance of the box with the help of a powerful GPU. The remote controller is sufficient for normal users but it is not thrilling, and the quality control is much better. If you are looking for a decent Android TV box at a reasonable price, then it is a better choice for you.

Kingbox K3 Android TV Box

Are you planning to purchase Android TV Box for your family but want something with better hardware and better capabilities? If yes is your answer, then you should consider Kingbox K3 Android TV Box right now. In terms of performance, software, and hardware, the king box is less expensive and more affordable to everyone. Kingbox runs the latest Android 7.1 Marshmallow OS and comes with a vanilla version of the newest KODI 17.6 software. It offers free plug-ins which means you would be able to customize it by considering your overall needs. The Kingbox K3 supports both 4K and 1080p resolutions and also H.265 hardware decoding to decrease the pull on bandwidth. You should note that TV comes with a mini keyword and remote for faster and smooth control. This Android TV Box does not provide 3D support but offers better performance in both hardware and performance. If you are looking to maximize performance for the least possible money, then you need to consider Kingbox K3 Android TV Box.

Xiaomi Mi Box S

Xiaomi Mi Box S is a great Android TV Box that supports 8GB of memory, 1GB of DDR4 RAM, and Android TV 9.0 Pie. The Google Play Store, Google Assistant, and Chromecast are built-in. You can also experience Dolby and DTS surround sound audio which supports Bluetooth 4.2, and wireless 802.11a/b/g/n/ac. If you have 1080p TV at your home and you want to upgrade it with an Android TV experience, then you should consider buying Xiaomi Mi Box S for sure. It is not expensive and small. It would be better for you to note that it only supports 1080p streaming and no Ethernet. Since this Android TV Box supports full HDR formats, you would be able to enjoy images that are of great quality and perfect clarity. This Android TV Box offers great performance to the users but a bit laggy for 4K video. Also, it does not run 64-bit Android TV apps, and YouTube HDR not available for the users. It is not expensive and easily affordable for everyone. If you are having a tight budget but do not want to compromise on the quality, then it is the right time to consider buying Xiaomi Mi Box S in your lists. It is a low-cost and reliable option which will offer you excellent performance and great features for this price.

EVANPOT95Z Plus

The EVANPOT95Z is quite a bit expensive Android TV Box but it provides better hardware and attractive design to the users. It uses the Amlogic S912 octa-core processor which is much better and faster than standard quad-core processors. It supports both 2.4 and 5.0 GHz WiFi connections. It offers 3 GB of DDR3 RAM and 32 GB of storage which save you from the hassle and various other issues. It would be better for you to remember that the extra RAM will surely increase the performance and speed of the TV box for a smooth and comfortable entertainment experience. If you prefer a 3D graphics accelerator, then you would be glad by knowing that it allows you to bring 3D cinema right into your home. The EVANPOT95Z comes with both a mini keyboard and a controller. The keyboard is backlit so that you would be able to check with the lights turned down everything and it is also compatible with the computer. This Android TV Box is one of the most reliable and advanced TV box available in the market right now. While there are other products with better software and hardware, they come at a higher price, making this one of the affordable TV Box for 2020.

Phantio MX10

The MX10 Smart TV Box is a simple plastic box in black color without any graphics. This Android TV Box is powerful and compact. It has a great setup process that comes with a friendly layout and also straightforward. You are not going to face any issues even if you are using it for the first time. It is easy to connect your keyboard, display, and mouse and you are ready to go. You would be able to set up your gaming consoles without any issues too. This Android TV Box for 2020 is fully equipped with the latest Android 9.0 operating system. It is powered by RK3328 and works efficiently and loads games, movies, pictures without any lags or delays. It is fully compatible with various Android apps. The signal of Wi-Fi is fast and of better quality, making the internet experience smooth and better than ever. This box comes with 4GB RAM and 32GB memory and you can even expand it to 128GB. It supports 1080p picture quality which you are going to experience a rich and smooth visual effect. The price is also affordable and you can get discounts at the time of buying it online for sure.

Conclusion

Finally, you are aware of the best Android TV Box for 2020 which you need to consider at the time of buying online or offline. All the above-mentioned Android TV Boxes are affordable and you do not have to compromise on your budget while buying any one of them. So, what are you waiting for?
