In brief

The five best email clients for Windows 10 are eM Client, Mailbird, the built-in Windows 10 Mail app, Microsoft Outlook, and Mozilla Thunderbird.

If you prefer checking your email at least once every day and your work includes communicating with clients and customers, then it is clear that you are dealing with email all the time for sure. To make your emailing experience better, you need to get rid of unprofessional web interfaces that are unreliable and genuine. There are innumerable people worldwide who prefer using email clients' software to meet their overall business requirements. It is a computer program that helps control and accesses a user's email. In addition, Desktop email clients are much more rapid and smoother than their web-based counterparts. As a result, users would be able to handle heavy email loads regularly easily without any hassle.

Best Email Client for Windows 10

Are you looking for the 5 best email clients for Windows? If yes is your answer, here are the best 5 email clients for Windows you should be aware of right now!

eM Client

If you are receiving a lot of emails regularly, then it is the right time to install eM Client on your computer without any second thought. You should note that it is a feature-packed email client for macOS and Windows. The interface is incredible, and you are not going to face any issues at all. It works with all the major email services, and you would be able to deploy it from the cloud by going through the server settings. If you are using a different email client such as Thunderbird or Microsoft Outlook, it will be easy for you to import most data with just a few clicks instead of going for a manual procedure from the startup. Those users who are using it for the first time should try the free version first before proceeding further for the paid version. The free version will allow you to manage only two email accounts.

Mailbird

Mailbird is a famous and widely used email client for Windows which supports Gmail, Outlook.com, Yahoo, and various other email providers. It has an elegant design and an attractive freemium pricing model. The exciting features are app integrations, a unified box, email snooze, multi-language support, and many more. Mailbird always recognizes that all the email users have various needs by including unique layouts to match your overall work. If you are receiving only a few emails every day, then it is straightforward to configure Mailbird so that you would be able to click on an email easily and see the contents in the same window. Also, you can even check out more unread messages at the same time while getting a lot of emails. It integrates with nearly 50 apps and services, making it a perfect choice for users who live in their inboxes. With famous workplace apps like Asana, Trello, Slack, and chat tools like WeChat and WhatsApp, Mailbird becomes a genuine and trustworthy hub for project management and communication.

Windows 10 Email Client

Windows 10 email client comes with a built-in Mail app that allows accessing your various email accounts (including Yahoo, Outlook.com, and others) in a single and centralized interface. You do not have to go to different websites or apps for your email. It has its default email program called Mail App. You can even change the default program as per your preference. For example, users can set Outlook as their default email program in Windows 10. You can even customize your email experience by going through the setting options for sure. The interface is clear and simple, and you would love to check your emails regularly. The great ability to connect multiple accounts and fluid formatting makes it even more suitable for the most demanding email tasks. You should note that it integrates with the Action Center, which is another great thing for this app.

Outlook

Microsoft Outlook is not free to use and but it offers a 1-month free trial for business and home users. In addition, if you are a student, then your school will have a partnership with Microsoft, which would allow you to sign up for Office 365 Education for free. It is right that Microsoft Outlook does not have an attractive design, but you would be able to work smoothly with calendar, email, tasks, contacts, and more from one place, and that is the most important thing for everyone. Moreover, all the enterprise users can take the help of its enterprise-grade security features, saving their important information from hackers and various other malicious third parties. It is available on both Windows and macOS, and there is a special version for the web and mobile devices. It is known for its comprehensive features and great integration with various other Microsoft products.

Mozilla Thunderbird

This email client for Windows is available free for everyone, and the Mozilla Foundation developed it. In 2014, it was released and loaded with perfect features and available in 59 languages for the users. You should note that it even supports addons and themes so that you would be able to customize it as per your overall needs and wants for sure. If you are going for the lighting addon, you can organize your schedule and various other important events in a calendar. It will be fully integrated with your Thunderbird email, and you would get a notification before any event or schedule. It is available on all major OS which includes Linux, Windows, and macOS. Also, it integrates with Google Chat, XMPP, IRC, and Twitter which means you would be able to use these apps from within Thunderbird itself. Finally, you are aware of the 5 best email clients for Windows. All the above-mentioned email clients are safe to use and improve your overall experience for sure. Some of them are free to use, and you do not have to pay anything to use them. Just try any one of them and share your amazing experience here with us right now!
