Are you looking for the PC Unlocker Alternatives? If yes is your answer, then you are in the right place. There are several Windows Password recovery software's available on the internet, which is mainly used to recover, remove or reset the password easily without any hassle. Let's go through some of the best Window password recovery tools which you can use right now itself.

Ophcrack Windows Password Recovery Software

Ophcrack is also one of the famous password recovery programs available on the internet for users.

Here are the steps you need to follow for using this software

Step 1 - Download

First, visit Ophcrack's website and click on the "Download Ophcrack LiveCD" link. For Windows XP users, click the link for "Ophcrack XP LiveCD".

Step 2 - Installing to DVD or CD

For installing Ophcrack on a CD/DVD, you should mount the ISO image which you have downloaded. In most of the windows versions, whenever you are going to double-click the downloaded file, the Windows Disk Image burner would be opened. You just need to choose the drive which you need to burn and click on the burn button.

Step 3 - Installing to Hard Drive or USB Flash Drive

You should download the Universal USB Installer from Pen Drive Linux. Once it has been downloaded, you should run and agree to the license agreement. Click on "Try Unlisted Linux ISO (New Syslinux)" in the first box. Now you need to browse your file and choose your USB drive letter and click on "create" button.

Step 4 - Adding tables

For adding the vista tables, you should create a folder named "vista free" in the tables folder on your USB drive, CD or DVD.

Step 5- Using Ophcrack

To use Ophcrack, you need to boot from your USB drive or CD by going through the BIOS menu. Ophcrack would get opened after a few minutes and you need to click on "Crack" to recover or crack your password.

iSeePassword Windows Password Recovery Pro
