In brief

If you have downloaded any image recently from the internet and checked that the image you have downloaded has a webp extension, you should not worry about it. Nowadays, it is easy to help several helpful websites for converting webp to JPG or PNG online.

If you have downloaded any image recently from the internet and checked that the image you have downloaded has a webp extension, you should not worry about it. Nowadays, it is easy to help several helpful websites for converting webp to JPG or PNG online. WebP is a new image format with better image quality and excellent compressions, but not all image viewers and web browsers support it. All you require is an efficient and reliable webP to JPG converter to help you get the file in your chosen format. With many tools available in the market, it becomes difficult to choose a reliable and genuine one as per the overall needs. If you are also looking for the best websites to convert webp to JPG or even PNG online, then you are at the right place. Here you would come to know about the best websites that can easily convert webp to JPG.

EZGIF

EZGIF is one of the most famous and reliable webp to JPG converter available in the market for users worldwide. You would be glad to know that in addition to being a top Webp to JPG converter, it can handle various other tasks like cropping or optimizing GIF files, resizing the GIF files, and many more. The user interface is pretty simple to use, and you will not face any issues at all. Also, you do not have to be tech-savvy for using this website. It can help in converting Webp to GIF, PNG, and also to MP4. It can even convert videos to Webp. You should note that it also accepts files of up to 35MB for conversion. The uploading process is also fast and smooth, making it more unique from other converters available online. Just upload your Webp file and click convert. After completing the conversion process, you would be able to download or edit the produced JPG.

CloudConvert

CloudConvert is also one of the popular and genuine webp to JPG converter available in the market. You should note that it supports more than 200 formats and can accept the source files from your PC, Dropbox, OneDrive, and even Google Drive easily without any issues at all. This genuine converter has its API to integrate the tool with your app. Also, it offers a secure channel for the transmission of files. You can even customize the output as per your overall requirements easily without any issues at all. It would be better to understand that it supports all video, audio, ebook, document, image, presentation, and spreadsheet formats. There is no need to download any software as you would be able to use it online. It is free to use, and you do not have to go for any pricing plans for your overall needs.

iLoveIMG

iLoveIMG can convert any image to JPG or PNG online, and you would be able to upload the source files from your computer, Google Drive account, Dropbox and convert them for free. It is also completely free to use, and you do not have to pay anything for using it at all. The interface is incredible, and you would love to use it again and again for sure. You would be amazed by knowing that it supports batch conversions. Also, you can allow an unlimited number of sessions per day. If you are going for the band promotions, then you can easily add watermarks to the images.

Convertio

Convertio is most primarily used for video conversions, but it can also convert webp to JPG or PNG online for free. This website is safe to use and allows you to accept the webp files from your PC or cloud storage like Google Drive or Dropbox and then turn them into your desired format. You should note that it supports more than 300 formats and keep your converted and source files secure by deleting them instantly and after 24 hours, respectively. It also provided an API for custom integration with your tools. The interface is clean, and it is easy to handle for everyone. The converting process is fast, and it will not waste your precious time for sure. You need to drop your files on the page, select an output format and click the "Convert" button. Just wait for a few seconds for the completion of the process. You would be glad to know that it browser-based and works for all platforms smoothly without giving any trouble to the users. You do not have to download any software for using it as you would handle everything online.
