In brief

Due to the complex byproduct philosophy of Apple, iPods do not allow the user to download videos directly from online websites, but that does not mean it is not possible. Instead, you can download videos on the computer then move them to the iPad or download them on the iPod itself using third-party software.

Due to the complex byproduct philosophy of Apple, iPods do not allow the user to download videos directly from online websites, but that does not mean it is not possible. Instead, you can download videos on the computer then move them to the iPad or download them on the iPod itself using third-party software.

In this guide, we will discuss the top 5 video downloaders that can help users download and move videos to iPad. So, without further wasting your time, let's get on with our guide on the best video downloaders for iPad in 2021.

List of the Top Video Downloaders

Following are the best video downloader for iPad.

1. Softorino YouTube Converter 2 (SYC 2)

SYC 2 (Softorino YouTube Converter 2) is popular software that allows you to download videos directly to the iPad from the computer. Here is a step by step guide on how you can download videos using the SYC 2: Step 1: To download videos with SYC 2, you need to download the software from the Softorino website and then follow the installation wizard to install it on your computer.

Step 2: After installation, launch the SYC 2 application, then establish a connection between your computer and iPad via the Standard USB cable or wirelessly with the Wi-Fi feature.

When you connect via the Wi-Fi option, ensure you have established a connection via the USB cable at least once.

Step 3: Now, copy the URL link of the video you wish to download, and SYC 2 will automatically pull up that link for you; it will be added to the download queue. There is also an in-app browser of the software that lets you search for the videos by remaining inside the application.

Step 4: Once you have found your desired video, it is time you select the output format to Video, resolution per your choice, and the device 'iPad'. After you have set everything, you need to click on the "Convert & Transfer" button, and the SYC 2 will move video files to iPad in just a few minutes.

Step 5: The last thing you need to do is visit the Videos app or TV app on your iPad and look for the video that you just downloaded with the help of the SYC 2 application. This is how unbelievably easy the SYC 2 makes for the user to download videos and move them to the iPad.

Pros

- It lets you download videos from more than 66 sources
- No iTunes syncing is required
- SYC 2 is fast and very efficient
- It supports all Apple devices
- Other than videos, users can download Audio and make ringtones

Cons

- None

2. WALTR Pro

WALTR Pro app is not a downloader in short, but it can help the users move videos to iPad in just a few seconds without the need for iTunes. Here is a step by step guide on how you can move videos to iPad using the WALTR Pro application:

Step 1: For the purpose of transferring videos, the first thing you need is to download the WALTR pro software from their website and then install it on your computer; the app is compatible with both macOS and Windows.

Step 2: Now, you need to launch the application and connect your iPad to the computer through a standard USB cable or wirelessly via the new Wi-Fi feature introduced by the company. When you connect through the Wi-Fi option, ensure both devices are on the same network.

Step 3: Once the connection is established, you need to drag the video files that you want to move to the iPad and then drop them into the WALTR pro app's interface. The application will do the rest of the job for you by transferring the video files to their respective destination on the iPad.

If you are wondering about the format of the video, then do not worry because the WALTR pro application converts the files to the Apple compatible format during the transfer process.

Step 4: When the transfer process is complete, you have to visit the TV app on your iPad > Library > Downloaded and find the file you just transferred using the WALTR pro application. This is it; you just learned how to move videos to iPad using the WALTR pro application.

Pros

- The WALTR pro application helps you transfer all types of files, including videos, audios, documents, and more.
- iTunes sync is not required
- Lets you transfer tons of files and folders
- The app is fast and very efficient
- No need to convert the video files

Cons

- Sometimes Automatic Content Recognition does not work

3. Cloud Video Player Pro

Cloud Video Player Pro is an iPad downloader that helps users download videos on their iPad device from any site they want with just a single click. The videos are saved in the app storage system, which can be protected using a passcode. Some of the video formats include MKV, MP4, AVI, WMV, m3u8, etc. Moreover, users can also download subtitles of the video using the Cloud Video Player Pro.

Pros

- It lets you download videos with just a single click
- Users can enable passcode to protect the videos
- It has a user-friendly interface
- Free to use

Cons

- Not compatible with all of the devices

4. Video Download Pro

Video Download Pro has a simple and easy-to-use interface that allows users to download videos to their iPad from the site itself. The downloader has in-built file management and a media player that helps users to manage all the videos easily. The best thing about the application is that it gives the users an opportunity to move videos to the iPad gallery to share with other people.

Pros

- Easy to use interface
- Allows to save the videos to camera roll
- Media manager and media player
- Fast and efficient

Cons

Only download videos from limited sites

5. DownloadMate

DownloadMate is an iPad downloader that lets the users download the videos from the website directly to the iPad. The application also has an in-app browser with tabs and a basic authentication via the HTTP integrated with Google Search. The best thing about the application is that it allows the users to compress the downloaded videos to ZIP files.

Pros

- Allows to download videos with a single tap
- In-app browser
- Compress the videos to zip files
- Import videos to camera roll

Cons

- Does not support YouTube

Final Verdict

Videos are becoming the most important entertainment tool for everyone, and that is why people are spending more and more time on mobile phones.

This article has presented you with some of the top video downloaders that can help you download or move videos to iPad in just a few clicks. We are hopeful that you have picked out the perfect tool for yourself, but if you have not, we will encourage you to try out SYC 2 and WALTR 2 as they both help users grab videos in the original quality as fast as possible.
