In brief

BitDefender Total Security is a top-rated antivirus solution that delivers fast, real-time malware protection across Windows, macOS, Android, iOS, and Linux without slowing down your system.

Are you looking for a reliable and effective antivirus tool for the safety of your computer? If yes is your answer, then you should install BitDefender Total Security software right now in your PC. It is a high-quality and fast real-time protection tool with efficient and fast virus removal. It also has an easy-to-navigate user interface for the users.

The BitDefender Total Security can be installed on all the major operating systems which include Android, Windows, iOS, and macOS. It is also easy to install it on laptops and desktops running Linux distributions, such as Ubuntu. Bitdefender can help you in optimizing your PC performance, keep your home network safe and manage sensitive data. It is one of the best antivirus software available in the market right now for personal use.

Let's go through some of its Pros and Cons right now

Pro

- It gives the best protection from malware and also cleared the protection tests by the independent test labs.
- It does not decrease the speed of your computer. It scores well in all the performance tests.
- There is a quick scan option which can easily perform a quick checkup of your computer at any time. It will scan your computer in-depth.
- It gives full features including anti-ransomware, webcam protection, password manager, a free VPN, and parental controls.
- Bitdefender has received excellent reviews from its users and also considered as the most user-friendly antivirus software available in the market right now.
- The price is not much expensive and you would get a deep discount online for sure.

Cons

- The only drawback of Bitdefender total security software is its limited free VPN. You would get only a 200mb daily limit in the Free VPN. It is sufficient enough to do online shopping and banking securely, but not possible to stream movies.

Pricing

Bitdefender Total Security also has a premium version that you can use if you want more advanced features and limits. The free package comes with a daily limit of only 200MB which would not be suitable for most of the users. You can download BitDefender for free with a great 30 days free trial. For accessing the free trial, you should register a free account at BitDefender official site. You have to provide your email address only for creating your account in BitDefender.

After completing your trial period, you can choose any of the six billing plans. By considering your security needs, you can buy a two- year, three-year or even a one-year license. It is also possible to select between a five-device and a ten-device license.

Conclusion

I have personally installed Bitdefender Total security software for the protection of my computer. It really helps in giving full protection from the malware and maintains the speed of your system. If you haven't used it, then you should install Bitdefender right now to see its great features and benefits. It gives you the total online security and also blocks annoying adware.

Start using it now and share your experience here.
