In brief

Blue Mail is a best email client for android where you can handle different emails at one place. The application also provides a unified feature where we can see all emails under one tab.

Handling multiple email accounts in with different email client will be a difficult task. It is better to keep all the emails whether it is your personal email or your work email at one place. Most of the android users are looking for application to manage all the emails at one place.

For Android, there are so many free applications available, so for android users, getting a good email client will not be a very difficult task. Now we are going to see one of the best Email Client for Android, 'Blue Mail'.

As like the other email clients, blue mail also can handle with multiple email account, whether gmail, yahoo, or your domain email, google apps email, anything. But this application comes with an attractive design with a stylish blue and white colour combinations. The application is very fast, as there is no delay in opening an email.

One other feature of this application is that you can switch to different email account to see all the emails, as well as there is a unified tab in it in which you can see all the emails together there. Each email account can be distinguished with a unique colour also, to identify which email belongs to which account and all.

When composing a new email also, you can select from which account, you wish to send that email from also. So you do not need to switch to any account to compose a new email.
