In brief

Are you looking for a good application to save your mobile data. Then here comes the Official Application from Google named Datally.

Are you looking for a good application to save your mobile data. Then here comes the Official Application from Google named Datally. Datally is a mobile data managing application in which google claims that you can save upto 30% of data by using the application.

Using this application, you can monitor all the application which consumes the data and you can put rules or restriction for each application from being use the data. The app will be handy for those who are limited in mobile data. Google earlier started the testing of application in Philippines and now its rolled out globally to all the users.

Datally gives you an option to monitor how much of it you use on an hourly, daily, weekly or monthly basis. It can also give you personalized recommendations to save more. Once you understand how you are consuming the data, the app gives you more control. When you are using your apps, you can block background data usage and track real-time data usage. And if there is an app using too much data, all it takes is a single tap to block it.

The app also let you know if you are close to a public WiFi and connecting you. The app has a rating system for public WiFi spots, which is maintained with user participation. So you can identify if that wifi can be trusted or not etc.
