In brief

Degoo is a cloud storage and backup service that offers up to 100GB of free space, with paid plans starting at \$2.99 per month for 500GB and \$9.99 per month for 10TB.

Degoo is a new cloud storage and backup service provider for storing your files online easily. It offers 3GB-100GB space for free and you do not have to pay anything for using it. Users will be able to get more storage from Degoo by sharing their processor power. It is one of the best and genuine cloud drive options for users all around the world. Degoo is very fast and simple and also focused mainly on the security of users and its files. It has a better backup and deleted files can be kept for 14 days which is very impressive in case you have changed your mind or want to recover deleted files.

This cloud storage application can help users in storing any kind of data to any device easily without any issues at all. You would be able to share your files (videos, documents, and pictures) with other persons. There is a feature of document editing which can help you in editing your documents online at any time. Users can save important personal and business data and then access from remote computers easily to any other device such as a computer and mobile phone.

The user interface is simple and easy to understand for the users. It also offers great and professional customer support to users. It is available for both IOS and Android users. The free version is limited and you are not allowed to do manual uploads but you can go for the automatic photo uploads.

Features of Degoo Cloud Storage

- Free backup of 100GB
- Android & IOS backup
- Better referral program
- Connect to multiple devices
- Swedish based privacy
- Not expensive
- Save mobile phone and battery
- Auto upload
- Better customer support

Users can avail of the benefits of Degoo Cloud storage for free up to 100 GB. If you are looking for a more cloud space, then you can go for the paid plan which can give you the cloud space of 500 GB. It is available at just \$2.99/monthly. Another paid plan gives users the cloud space of 10TB and also available at just \$9.99/monthly. If you are using Degoo for the first time, then it would be better to go for a free version before proceeding further for the paid ones.

Conclusion

Degoo is a reliable and genuine cloud storage tool that can recover your data from any device easily without any hassle for sure. I have used this tool many times personally and amazed by seeing its helpful features. You can back your files on the desktop, with an internet connection and an account. It is also easy to install it on the mobile phones and then use it to save your data without any problem even you can back up your files from several locations. With 100 GB cloud storage from Degoo, you would be able to upload all your files and photos and never risk losing them for sure.
