Pricing of Driver Booster

Now, when you are clear with the difference between the driver booster free and the driver booster pro, let's have an idea about the pricing. If you plan to get the driver booster for three PCs, it will cost you an annual subscription of \$22.95 per year. A monthly price of \$1.81 will help you with the whole plan.

If this does not suit you, you can buy it in the form of a bundle's part. The bundle is available inclusive of the IObit uninstaller pro. The smart defrag pro and the protected folder. This pricing plan is available at a yearly rate of \$24.95 for one year, and the monthly plan begins at \$2.90. So if you sit and compare, you might feel whether paying the extra \$2 is worth it or not?

The inclusive plans and software utilities are an excellent investment for favorable and smooth functioning. So, paying a nominal amount of \$2 will work in your favor only.

Also, if you are skeptical initially, you can go forward to download the trial version of this free driver update. The trial version is available on the IObit website. The trial version is valid for two weeks, that is 14 days. First, however, you should know that:

- The trial version does not come with an automatic update driver option, even though the PC is non-functional.
 - The trial version limits the user from updating more and allows updating two drivers in a single day only.
- If you are not planning on buying the full version, this is a significant point to consider.

Here's a better plan for you. The PRO version comes with a 60-day (2 months) money-back guarantee. So, why not avail this and see what's in store?

Conclusion

While using the update driver for free, you restrict yourself from some useful features as part of the driver booster PRO. But, working in an updated software solution, the Driver Booster emerges as a clear winner. The usage is easy and stands out in competition thanks to its splendid and new-age features.
