In brief

Gmail is one of the most popular and commonly used email clients which help to manage emails, documents etc.

Gmail is one of the most popular and commonly used email clients which help to manage emails, documents etc.

EML is a file format used to store email messages along with header, footer, hyperlinks etc.

EML to Gmail conversion can be done both by manual method or software methods. In this article, we are describing both the methods for you.

Manual method to convert EML to Gmail by configuring Gmail in Thunderbird

- Go to Gmail account and click on the gear icon to navigate the settings
- Click on settings and under forwarding POP/IMAP, enable IMAP option
- Open Thunderbird, Click File > New > Existing mail account
- Provide credentials of Gmail account and configure it in Thunderbird
- Select EML files from Thunderbird to Gmail. EML files are saved in Gmail and you can easily access them

Limitations of Manual method

- Thunderbird installation needed
- Need technical knowledge
- Lengthy and time-consuming process
- Complex procedure, not easily understood

Working of EML to Gmail Importer

Step1. Easy adding of EML/EMLX files

You can download the software from the this link

Download and install the software successfully and you will see the software interface.

Now the software asks you to swiftly add EML/EMLX files to the wizard as per your requirements.

(Also see: What do You need to do on Your iPhone before selling?)

The software after loading of files to the wizard shows a clear preview of all files which you have selected to export. This will help you to check the accuracy of data files.

Step 2. Authenticate your Gmail account

The software asks for an email address and password and swiftly connect to your Gmail account.

Step 3. Selection of Folder to save the exported files

In this step, you are required to select a particular folder to save EML/EMLX files. You can create a new folder and save exported database to Gmail account. This will help you in easy identification of the files.

Step 4. Process

This is last and final step in EML to Gmail import. Once you move cursor to 'process' button. It will start executing the process and completes it into few minutes.
