In brief

Google Assistant is Google's voice assistant. It supports both voice or text entry and it would follow the conversation whichever entry method you are going to use.

Google Assistant is Google's voice assistant. It supports both voice or text entry and it would follow the conversation whichever entry method you are going to use. Google Assistant offers voice searching, voice commands, and voice-activated device control, allow you to handle several tasks after you have said the "Hey, Google" or "OK Google" wake words.

Google Assistant is mainly designed to give you conversational interactions. It is an AI-powered virtual assistant that will follow all your questions and answers them right away. The Google Assistant is available on Android mobile phones and IOS devices. It is ready to help when and where you need it.

You would be able to manage your overall schedule, get help with everyday tasks, enjoy your entertainment, control smart-home devices, and many more. You can easily find answers about attractions, businesses, and restaurants, including traffic info, business hours, and Google Maps directions.

If you want to search for the best car parks or restaurants near you, then you can even do it with the help of Google Assistant.

How to get Google Assistant App?

Android Phone

If you want to download the Google Assistant app on your android phone, then you should note that it does not have a separate .apk to download. You can get it from the Google Play Store if your device meets the overall requirements.

Just open the Google app and tap menu, settings, and enable Google Assistant. It is a simple process and you are not going to face any issues at all.

iPhones and iPads

Are you using an iPhone or an iPad? If yes is your answer, then you should first download and install the Google Assistant app. It is easy to download and available in the US store only. Make sure you are changing the store to install the Google Assistant properly.

Once you are done with installing the Assistant app, then you need to open the Google Assistant app and say "Ok Google". After doing this, you can ask any question or ask the assistant to do any tasks.

Android TV

Now, you would be able to use the Google Assistant on your Android TV. If you have a supported device, then you need to upgrade your Android TV to start using the Google Assistant.

Android Wear Watches

Of late, most people prefer using Android wear watches due to its several features and benefits to the users. You would be glad by knowing that if you are having an Android wear watch, then you would be able to use Google Assistant without any hassle for sure.

You should note that not all watches support this feature and you should enable this feature to get the best out of it. Just go through your watch settings, go to personalization, Turn On Google detection, and start using Google Assistant.

Is it possible to change the Google Assistant name?

You might be thinking about changing the Google Assistant name in the coming days. It would be better for you to understand that it is not possible to change the Google Assistant name as of now.

You can only call the Google Assistant. It would be fun to change Google Assistant by name so that you change it every week or maybe every day easily without any issues at all.

Is it possible to rename My Google Assistant?

If you are planning to rename My Google Assistant, then you should note that it is also not possible as of now. It does not have a name and you are not authorized to give any name as per your choice. There is no doubt while saying that this feature will be added in the coming years for sure. But now there is no evidence or strong proof for this.

Can Google Assistant Read my WhatsApp Messages?

Nowadays, most people want easy access to their WhatsApp messages through Google Assistant. If you are also one of them, then you would be glad by knowing that now you would be able to make Google Assistant read all WhatsApp messages without any issues at all.

It is a great feature if you prefer using AirPods or earphones etc. To start this process, you need to launch Google Assistant first and then say "Read my messages". After doing this, you are going to see a message for permission. Click Ok.

Now the "Notification access" screen will be opened. You just need to enable notification access for the "Google" app. Just click allow on a confirmation screen.

Google has enabled notification access.

You should open Google Assistant again and say "Read my messages". If you have received any new messages in WhatsApp or any other app, then Google Assistant will help you reading all those messages for sure.

Can I reply to WhatsApp Message from Google Assistant?

Yes, you can easily reply to WhatsApp message from Google Assistant without any hassle for sure. You should note that the Google Assistant will ask you if you want to give a reply to your WhatsApp message.

You need to say Yes and your message will be delivered to the person instantly. It will also confirm the response it has drafted and say "Okay" and will send the reply.

Conclusion

At last, you are aware of the importance of using the Google Assistant app in your daily routine. It would help you in making things smoother and also save precious time for sure. You can set reminders and get alerts so that you can manage your daily schedule.

The Google Assistant will make it easy to take notes, add items, set timers to your shopping list, and even set alarms. As per the recent statement given by Google, it has been proved that more exciting features will be available in the Google Assistant for sure. Also, it is very easy to use for everyone, and no need to be tech-savvy for using this.
