What makes FlashGet Kids stand out?

FlashGet Kids is the best tool that works for your family. FlashGet Kids goes deep into parents' minds. It's a more comprehensive parental control app than ever. It covers from monitoring tools and location trackers to screen management features. Even greater, it offers a one-stop solution with a few taps for parents, thus giving parents peace of mind. On the one hand, it changes how people view parental control apps. This app lets you see and feel where they go and what they do outside. For parents who have never used the parental control app before, it could bring them a new perspective to keep their kids safe. On the other hand, this app enhances interactions with family relations. At FlashGet Kids, you can interact with your child more frequently, engage in their activities and phone usage, and be part of their life. This could largely change the way you communicate with each other. Being user-centered leads the way. This app makes every family possible to use. To help users understand and make it easy to use, they offer different services for users. For users, understanding how this works matters, and designing an intuitive-to-use interface also counts for them. So, this determines how FlashGet Kids is. A key part of FlashGet Kids to Keep children safe is always the priority. This app uses different features to build up children's safety. Unlike the other parental controls, FlashGet Kids offers stable and powerful methods to help parents protect online and offline safety. FlashGet Kids always values privacy. The information displayed on FlashGet Kids dashboard is handled with security and respect for users. With this commitment to safety, convenience, and user-first, FlashGet Kids is the best app for parents to protect kid's safety in the digital world.

Straight A Live Monitoring feature

Live Monitoring provides a different way to present how FlashGet Kids changes the perspective you monitor your kids. It brings you a powerful monitoring tracker. Live monitoring goes in a more focused manner. This offers an insight into how the child behaves and develops their social skills. It features Remote-Camera, One-Way Audio, and Screen Mirroring. Even notifications on FlashGet Kids express how FlashGet Kids values a child's safety as it monitors messages displayed on the child's phone.

Remote Camera and One-Way Audio

Remote Camera helps to express more detailed messages your kids sent to you. Remote Camera helps you capture things you've missed when kids go outside. It makes it easier for you to avoid potential risks and dangers. One-Way Audio explores more possibilities. The sound you hear from one-way audio is not just a clip. It is a proof between you and your child. Using One-Way Audio helps you record important voices that you hear. By keeping records on your phone, you can know your child more.

Screen Mirroring

Screen Mirroring is a way to provide parents with live screens. Screen Mirroring helps you to find out more. Get the instant apps that they are using from Screen Mirroring. With Screen Mirroring, You can use Screen Mirroring see what they are doing on phones and what apps they are using.

Notifications

Notifications keep track of everything new displayed on your kid's phone screen. Like any notifications, FlashGet Kids could notify parents with the latest info on their kids. It can also track push messages, anything from messaging apps to social media. With only one tap, you can see it all.

A more accurate Location Tracker

FlashGet Kids is also a powerful location tracker. Location Tracker transforms how parents use location tracker to stay connected with their child. A tracker lets you see their live location and location history and use GeoFence. You could use GeoFence to improve protection layers. This is a good way to see where they go, better targeting their safe area.

Live Location

Live Location sees your child's location in real-time. Live Location enables you to see your child's location with accuracy. You can find them anywhere anytime. You can get updated locations quickly and accurately.

Location History

Location History helps you keep track of the location that they have been for the past few days and better know their activities. Use location history and know their activity areas.

GeoFence

With GeoFence, you can personalize the safe place your child plays. This could largely reduce risks when they play outside. When they step out of the safe zone, you will get alerted on time.

Diverse management features

Various management features offer you more possibilities to develop their potential and talents. Using different management features on FlashGet Kids gives you more control over your kid's phone and engages in their life more than ever. It also brings you different options to manage your child's phone, anything from screen time to content filtering. Alerts feature is also a new way to manage your child's phone. Parents could get alerts from their children, respond to different situations, and take action.

Screen Time

Screen Time lets you configure the time your child spends on phone. And also it could set restrictions on any apps that they play. Whether it's social media or game apps, it won't be troubling.

App Blocker and Tracking App

App Blocker and Tracking App are powerful. App Blocker brings you more flexibility. You can block any apps you want, anything from game apps to toxic apps. Giving them limited access to unnecessary resources will help them build healthy mental and physical health. Tracking App could also help. It tracks your kid's app use and installed apps on their phone. With Tracking App, you can detect the virus app on their phone to steal the data from your kids.

Daily Usage

Daily Usage dives deeper into your child's phone use data. It gives you overall data on your child's phone app usage. Thus, you can make an assessment of your child.

Content Filtering

Content Filtering navigates your families to a better viewing experience in the digital environment. It provides your family with a healthy environment. Content Filtering gives you control over what content should be allowed and what should be restricted. Parents can filter out the content that is not appropriate for their age. And adjust the settings according to their age.

Alerts

Alerts feature is specially built for parents. No matter what they do and where they are, important message will get to you. With the best Alerts, you won't miss everything that they have accessed. Even, when their phones are powered off, you can get alerted.

How does it work?

FlashGet Kids is the best tool for families to use. It precisely captures everything you need. Perfect match for your needs. It uses different technology to help you identify potential dangers and find the best way to work for your family.

How to download FlashGet Kids?

Download parent's app on Google Play Store and App Store on the parents' devices. Open parent's app, you can follow the guide to download child's app on your kids' devices. And then, use the binding code on FlashGet Kids to bind and link with your kid's phone. After that, you need turn on the relevant permissions on your child's phone to keep the app running in the background. Finally, you can configure the Settings that work best for your family.
