### Quick answer

Font Size on the mobile sometimes an issue for most of the users. Some users find it comfortable to view and read contents in small font sizes whereas for others bigger or larger fonts are easier to read.

Font Size on the mobile sometimes an issue for most of the users. Some users find it comfortable to view and read contents in small font sizes whereas for others bigger or larger fonts are easier to read. For some others, font size never an issue and they were comfortable with the normal size on the mobile.

Android mobile has a built-in font changing option that lets you change the size to large, small, or normal. But this option will only change the size of the fonts used in the phone's default areas. It will not change the font size of applications installed on the mobile.

If you wish to change the font size of the chats in your WhatsApp, then it can be done from the WhatsApp settings. to do that, follow the steps.

Step 1: From your WhatsApp's main section, click on the menu option (3 dots at the right top).

Step 2: Then click on the 'Settings' menu.

Step 3: From the next window, click on the 'Chats' option.

Step 4: In the chats settings area, you can find an option called 'Font size: Medium'.

Step 5: Click on that, you will get three options for the font size, Small, Medium, Large.

Step 6: Click on the preferred size, to set it for your chats.

By default, it is set as 'Medium' which is the standard normal size of the phone, If you set it as 'Small', all the chats and messages will be displayed in small size. Please note, if you set it as small, it will be a bit difficult for some people to read the messages.

If you set the size like 'Large', the messages will be in bigger size and easy to read. But this will reduce the available messages that can be seen on the screen since it takes more space because of the large font size.
