Quick answer

How to turn on dark mode in Paytm, step by step, and what changes in the app once it is on.

Dark mode has become increasingly popular among users for its ability to reduce eye strain, conserve battery life, and provide a sleek, modern look to applications. Paytm, India's leading digital payment platform, has embraced this trend by introducing dark mode functionality to its app and web interface. In this guide, we'll walk you through the process of enabling dark mode on Paytm.

Why Use Dark Mode on Paytm?

Before we dive into the steps to enable dark mode, the main benefits of this feature are:

1. **Reduced Eye Strain:** Dark mode minimizes the emission of blue light, which can cause eye strain and fatigue, especially in low-light environments.
2. **Battery Conservation:** On devices with OLED displays, dark mode can significantly reduce power consumption, as black pixels require less energy to illuminate.
3. **Improved Aesthetics:** Dark mode offers a sleek, modern look that many users find visually appealing and less distracting.

Follow these simple steps to activate dark mode on the Paytm app:

1. Open the Paytm app on your smartphone.
2. Tap on the profile icon in the top-left corner of the screen.

4. Scroll down and tap on "Display."
5. Toggle on the "Dark Mode" option.
6. **Customize dark mode settings (optional):** Some versions of the Paytm app may offer additional customization options, such as adjusting text size, contrast, and background color. Explore these settings to tailor dark mode to your preferences.
