Quick answer

The Peacock Error Code 21 might be familiar to most Peacock users these days. You might have seen Error code 21 multiple times using the Peacock streaming service.

The Peacock Error Code 21 might be familiar to most Peacock users these days. You might have seen Error code 21 multiple times using the Peacock streaming service. This article will check Peacock Error code 21 and how to solve the error code 21 problem.

What is Peacock Error Code 21?

Peacock Error code is a common issue most peacock users face these days. Even if you are a free user or a premium user under subscription or the premium trial period, you may experience the Error 21 with your peacock TV. The problem is mainly due to the connectivity issue. If your internet connection is not stable or getting a significantly low speed for streaming, you might get the Peacock Error Code 21.

When considering this error code, it is also to be noted that error code 21 is not the only issue you may face. Errors can be of different types; the Peacock US roaming rule issue is one kind that many users face while roaming. Whatever the error type, it is frustrating to see these errors while watching your favorite movie or TV show on Peacock TV.

So, let's see how to solve the Peacock Error Code 21 for uninterrupted entertainment on Peacock TV. If you are not a peacock user, never forget to check the limited time peacock premium plan for \$1.99 per month.

How to Solve the Peacock Error Code 21

You can try the steps below to fix the Peacock Error Code 21. Make sure to check the peacock tv app after trying each step to ensure the issue is fixed or not.

Check the Internet Connection

The first and foremost step is ensuring the internet connection is working fine and stable. To check the same, open any speed test app or website on your mobile or PC, perform an internet speed test, and verify that you are getting a stable download and upload speed on your internet connection.

If the connection is powered or experiencing a low speed, contact your Internet Service Provider and ask them to rectify the issue. Otherwise, it won't be a reason for the Peacock error 21.

Latest Version Of the Peacock App

You can watch the Peacock TV content on TV, Mobile, Tablet, or even via the peacock website. Use the updated application if you watch the Peacock TV via an application on TV, Mobile, or tablet. If the application is not updated automatically, make sure to update the same manually. Peacock TV usually stops its support for older versions of applications. In short, if you are using an unsupported more aged version of the application, you might get the error code 21 on your peacock TV.

So make sure to update the peacock tv app to the latest version.

Update Pending Updates

If your device needs to be updated or you have any pending updates for your mobile, tablet, etc., update it. Similar to the peacock app update, a system update is also important. Peacock TV won't work on any unsupported OS., so update your device with the latest version.

Good VPN Connection

If you are accessing the peacock tv movies and tv shows from outside the US, you might be using a VPN service or a DNS proxy service. So a good and high-speed VPN service is needed for that. If you are using a free VPN app, you might experience a slow network, resulting in peacock error 21.

So, always use a trustable and good VPN service to stream the peacock tv content; thus, you could fix the error 21 issues on the peacock tv.

Contact Customer Support

Even after doing all the steps, if you see the Peacock Error code 21 on your screen, you need to contact customer care to resolve the issue. However, you must be in the US to get the support team. As per the help section details. Peacock TV is offering support for US customers in which the device must be physically located in the United States. So, remember to connect a VPN app or service before contacting the Peacock support team.
