Quick answer

There is no doubt that FireTV Stick or simply Firestick is an excellent streaming device. Like Apple, Amazon introduced its product with the industry's best quality.

There is no doubt that FireTV Stick or simply Firestick is an excellent streaming device. Like Apple, Amazon introduced its product with the industry's best quality. Even though Smart TVs are popular these days, many users opt for streaming devices like Firestick, Android Box, etc. The smooth experience of Prime Video is one beauty of Firestick. When we speak about the benefits of Firestick, we can say that there are some downsides of Firestick also. The main issue is the availability of apps. We can install APK files on the Firestick, but we can't install PlayStore on Firestick. Instead, we get the Amazon App store to download and install the apps on the Firestick. Here the problem is the number of Apps on the Amazon app store. Compared to the PlayStore, the number of apps on the Amazon app store is more diminutive. If that's the case, if you wish to install an app that is not available on the Amazon app store, the only option is to jailbreak the firestick to install the application. So here we are going to see how to install apps on a jailbroken firestick, and also, we will look at some of the best apps for jailbroken Firestick.

What is a Jailbroken Firestick

If you are wondering what is jailbreak firestick means? Here is the answer. The term jailbroken came about the apple device in which users can unlock the device to overcome the country or region restrictions. It is almost the same here in the case of Firestick. Therefore, if you wish to install any additional application on your Firestick, it is essential to unlock and jailbreak the Firestick first. There is no complex procedure to jailbroke a firestick as in other devices. It enables the debugging mode in the developer option and unlocks the install unknown source option on the Firestick. To jailbroke Firestick, you can follow the below steps. Step 1: Go to the settings section on your FireStick. Step 2: From the settings section, click on the My Fire TV option. Step 3: Next, click on the Developer option. Step 4: Inside the developer option page, you can find two options.

- ADB Debugging
- Apps from unknown sources

Step 5: Turn ON both options. Now, both options enable you to install any third-party applications directly on your Firestick. In addition, this option turns your Firestick into a Jailbroken Firestick, and you can install firestick apps and any supporting APK file from party sources like APK mirror.

How to Download and Install Apps on Firestick

In the case of Firestick, the process of jailbreaking and installing the app is considered installing the Kodi app. You might have heard of Kodi. It is an all-in-one Streaming app that offers an extensive library and plugin-based service. The main advantage of Kodi is that you can install almost any plugin that offers free and paid service, including Live TV, Movies, Sports, Music, etc. But jailbreaking is not limited to installing the Kodi app on Firestick. You can install any apps that offer the support for Firestick. To install additional third-party apps on your Firestick, go to the App Store on your Amazon Fire TV Stick. Then search for an app named Downloader. Download and install the downloader app on your Firestick. Now, with the help of the Downloader app, you can install third-party apps on your Firestick. Step 1: Open the downloader app, and paste or type the URL of any application you wish to install. Step 2: Click on the Go button to download the application. Step 3: Once downloaded, Firetv will prompt you for confirmation. Click on the Install button, and the application will be installed on your device. This is how you can install and add apps on Firestick. But always install reliable apps on your unlocked Firestick. Note: Within the downloader app, always enter the direct application URL (APK) to download the application. And remember to download the application only from trusted sources.

Firestick Apps For Your Unlocked Fire TV

The below-listed apps are the official apps from the respective providers, and they are not modified or unofficial ones. We are listing them here since the application is only available to the users of the United States. If your Amazon accounts are not in the US, you won't find them on the Amazon Apps store. In that case, you can install the app via Sideload or use the downloader app for those outside the US.

Pluto TV

Pluto TV is one of the best free live tv applications available for the users of the United States. They provide a large number of channel selections along with a few movie and series libraries. Moreover, Pluto TV is free, and you can use it without registration. Download Pluto TV From APK Mirror

Xumo TV

Xumo TV is also a similar service to Pluto TV. They also offer free live tv lists that you can watch without a subscription. However, the application of Xumo TV is not great, but it does the job well too. Download Xumo TV From APK Mirror

Peacock TV

Peacock TV is not a completely free live TV service. They offer few live TV channels but primarily focus on TV series and movies. Peacock TV is more close to Netflix and Amazon Prime Videos. It is a freemium model of service in which you can enjoy most of the content for free. However, premium contents need a subscription. Download Peacock TV From APK Mirror These three live TV apps are for Firestick and are exclusively for US users. If you are trying to watch the contents of these apps from any other country, always use a VPN connection and choose the location as the US. Peacock TV users might get a US Roaming Rule error if they are accessing from outside the US, but you can fix that in a minute without any additional cost. If you wish to install any other app on your Firestick, always download the Android TV version of the APK, which will work well on the device.
