

How to Record Amazon Prime Music at 5X Faster Speed

TechRounder PDF Edition

Live article: <https://www.techrounder.com/software/how-to-record-amazon-prime-music-at-5x-faster-speed/>

By Vipin PG | Published May 14, 2022 | Updated May 14, 2022 | Format: Guide | 5 min read

Quick answer

Amazon Prime Music only provides you with the offline playback function after paying for its music subscription service. Another obvious fact is that the downloaded Amazon music tracks are encoded in Amazon's protected M4A format, making them unplayable outside the Amazon Music platform.

Amazon Prime Music only provides you with the offline playback function after paying for its music subscription service. Another obvious fact is that the downloaded Amazon music tracks are encoded in Amazon's protected M4A format, making them unplayable outside the Amazon Music platform.

To tackle the issue, perhaps you have come up with the idea to record music from Amazon Prime directly. But rather than mentioning the normal screen recording method, which may require time and energy to split music tracks, this article will recommend a much more convenient solution to help you download and save songs, playlists, and podcasts from Amazon Music locally. In addition, music quality and ID3 metadata tags can be maintained as the original to provide you with a pleasant experience in music playback and management.

Record Amazon Prime Music Without Hassle - How to Achieve

So far, you may have tried some online programs but failed to record the songs from Amazon. One major reason is that those online recording tools are unstable. Also, they cannot handle protected audio files, not even helpful in making Amazon Prime Music unprotected.

Therefore, a 100% successful way to have Amazon Prime Music recorded free is to use a reliable third-party tool as an assistant. Therefore, we recommend the best software to record and convert Amazon Prime Music which is TuneFab Amazon Music Converter.

Best Tool for Amazon Music Free Record - TuneFab Amazon Music Converter

Compatible with both Mac and Windows computers, TuneFab Amazon Music Converter allows you to rip songs from Amazon Prime Music to MP3 all at once. In addition, it enables you to store Amazon Music locally and provides you the option to stream and enjoy high-quality playback directly. With this program, you can easily record any music content from your Amazon Music library, including songs, albums, podcasts, and playlists.

Preserve ID3 Metadata Tags

The recorded songs will all keep their original ID3 tag information including song title, album, artist, and album cover respectively. This converter can detect the tags automatically, and your music can be clearly organized. And you don't need to worry about managing a large number of songs anymore.

Tip: You can sort the converted music in a specific Artists/Album folder and then burn Amazon Music to CD for playback in your car. Just create your enjoyable commute!

Batch Conversion Available

TuneFab Amazon Music Converter enables you to add multiple songs in batches and convert the music all at once. Also, you can flexibly tweak output settings for all songs with one easy click.

Intuitive Interface

It's exhausting to find a recording tool with an interface filled with options and icons that are hard to identify. Conveniently, TuneFab Amazon Music Converter is embedded with a clear and user-friendly web player, which you can directly record Amazon Prime Music even without the Amazon Music app installation. Therefore, you won't waste time studying the complex meaning of each setting.

Multiple Output Format

This converter has more than one output format for you to choose from. You can select the one that fits the device you want to use for playback. It can record, convert, and save your Amazon Prime Music locally in MP3, M4A, WAV, and FLAC audio.

Fast Conversion Speed and High Quality

TuneFab Amazon Music Converter boosts a 5X faster conversion speed, which means you can get multiple albums recorded within minutes. In addition, the process won't impair your playback experience on any device, for it can keep the songs in high sound quality.

Tip: You can tune the audio parameters such as bitrate and sample rate to 320 Kbps and 44.1 kHz settings. This can guarantee you a decent music quality with as many details as possible and offers a smooth and pleasant playback experience.

How to Record Amazon Prime Music on Computer in 5 Steps

After knowing the program's key features, the following is a detailed guide on how to record songs from Amazon Prime Music via this tool. Follow the 5 steps, and you can soon get the music files stored on your computer.

1. Download, install, and launch TuneFab on your computer

Directly go to TuneFab's official website and download the Amazon Music Converter to your computer. TuneFab can run smoothly on both Windows and Mac systems as a handy audio converter tool. Even if your old computers can be perfectly compatible with this converter, it has relatively low system requirements.

TuneFab Amazon Music Converter System Requirements

- Operating System: Windows 7 or later on 64 bit system, Mac OS X 10.12 or higher
- Processor: Any processor that is above 1 GHz
- RAM: 512 MB or higher of RAM
- Minimum disk space: 1 GB of free disk space for storage of converted music content
- Internet Access: Broadband connectivity

After a successful installation, launch the program, then a prompt window will appear with a quick demonstration of using the software.

2. Log in to your Amazon Music account

This special music converter is integrated with the Amazon Music web player. And it requires you to log in with an eligible Amazon account to access the Amazon Music library.

3. Stream, find your favorite songs, playlists, or podcasts, then add them to the queue

As you can perceive, the Amazon Music converter is fairly easy to grasp because it has an intuitive interface without any cluttered settings.

Directly utilize the search function to find the song, album, or podcast you want to download to MP3. You can also pick a random playlist and then click on the blue Add icon on the screen. Then all tracks from the playlist can be instantly added to a new Converting tab.

If you don't want to download the entire playlist, this convenient music converter supports the multi-select function. Choose specific songs and then drag them to the Add icon. Then they will be shown in the queue.

4. Choose your preferred audio format for exporting

The converting tab has neatly displayed basic song information such as Artist, song title, and song length. Various format options are also available. You can either convert all files to the same audio format or tweak the output format accordingly for each specific song.

Tip: By default, all songs will be formatted in MP3 in 256 Kbps. To change other parameters, you may click on the settings menu icon from the upper-right corner, select "Preferences", and then switch to the "Advanced" tab to set a custom sample rate or bitrate.

5. Record and convert all music content

Click on the Convert All button, and then all the selected music tracks will be converted to your chosen music format efficiently. To check your music conversion history, go directly to the "Finished" tab to view all music content.

Tip: After the conversion process, you can put the converted Amazon Prime music on a USB flash disk or hard drive for backup or transfer the converted MP3 audio to an old MP3 player to enjoy offline.

Final Thoughts

Recording music from Amazon Prime Music may once be a headache for you. But now, with TuneFab Amazon Music Converter, you can easily and efficiently do that. You can launch TuneFab Amazon Music Converter and record any music you love whenever you want to listen to Amazon Prime Music offline. Just download the converter and enjoy Amazon Prime Music freely from now on.
