Are you looking for a reliable and best Password Manager for protecting your personal data and passwords with multiple layers of security to make sure you are the only one with full access? If yes is your answer, then you should always go for the Password Boss Password Manager right now.

Password Boss is one of the genuine and trustworthy best password managers available in the market for users all around the world. It includes everything you require to keep your digital life secure and safe for sure. It also features a cloud backup section that ensures your information is always accessible in case you lost your device. It has an incredible interface that is simple to understand for everyone. Even if you are using it for the first time, then you are not going to face any issues at all. It is a perfect tool to have in your organization as you would be able to share passwords and accounts for several applications. This software is extremely easy to use and available for everyone - enterprises, family, or individuals- who want to store secure data and keep passwords safe. The Password Boss is available on mobile devices for iPhone and Android users, as well as in a desktop app for Mac or Windows. You can even access it via Firefox, Chrome, a browser extension for Chrome, and Internet explorer. Let's go through some of its best features you should be aware of

Dark web Scanner

The dark web is not a good online space where users buy and sell passwords and other important information. You should note that there are tons of ways your information would be appearing there for sure, usually via an info breach from a famous company like Facebook. With the help of Password Boss, your information will be safe and no one will have access to it for under any situations. It has a scanner that helps you easily know if any of your information is on the dark web..

Security Dashboard

The security dashboard examines your passwords and assigns your security a score based on what it finds. The screen will show which passwords are compromised by the dark web and can scan your leaked emails as well.

Cloud backup

This password manager features a cloud backup section which ensures your information is accessible in case if you have lost your device. It is also possible to disable the cloud backup option if you want data to be stored only on your device and not on cloud storage.

Emergency Access

It also contains emergency access features where anyone can easily share access with emergency contact via their email address. You should note that they will be allowed to do so only for a limited time frame. It is better if you lose your device and need a loyal friend to pull the password manager's contents from another device.

Password Boss Plans and Pricing

You would be glad by knowing that the password boss plans are much cheaper than most of the other competitors available in the market. The personal plan offers a free, Premium, or Family plan. It would be better for you to note that the free plan is offering a 30-day trial, and comes with all of the best features on the premium plan. You would be getting a ton of useful features like unlimited password storage and devices. Before going for the premium or family plan, you should try a trial version for all the standard features. For the premium plan, you need to pay \$2.5 per month and \$4 per month for the family plan. Next, you have a Business plan. It is divided into Standard and Advanced plans. The standard plan comes with all the advanced features in the Premium plan. Then, the advanced plan brings in more features which include extra account reports, more security policies, some audit logs, and many other things. For the standard plan, you need to pay \$3 per month and \$4 per month for the advanced plans. At last, each of these offerings is great. Every plan will add something substantial and they are an affordable price. There are enough plans so that you would be able to choose it by considering your overall needs for sure. The free trial ensures anyone can go for the Premium version of the software for 30 days. At the end of the trial version, your data will remain intact on your device and your account would be changed to the free plan. Later, you can decide to buy a plan which includes important features like online backups and device sync. The free plan is for those users who are looking for a full-featured best password manager but do not need their data backed up. There is also a 30 days money-back guarantee for the customers who are not sure about the product. If you are not satisfied with the services of this software, then you can ask for a refund within 30 days. You would get your money back within 24 hours easily without any hassle.
