In brief

If you look at all the VPN providers in the market, you will find no standard VPN provider that offers a "free" VPN service. There is one, iTop VPN.

If you look at all the VPN providers in the market, you will find no standard VPN provider that offers a "free" VPN service. There is one, iTop VPN. Benefiting from their advanced technology in Windows software development, iTop VPN has introduced an amazing variety and functionality.

It can access all the features that another VPN can. In the meantime, it does things that other competitors can't. And most importantly, the iTop VPN offers a lot compared to other VPNs - It is completely free of charge and does not require any credit card integration or does not require PayPal login.

iTop VPN - A Stable and Fast VPN on Windows that Can Be Used for Free!

iTop VPN is an agile and real free VPN for privacy protection and provides easy access to unlimited video games, music, social media, and streaming from anywhere in the world. The iTop VPN encrypts all Internet traffic data with banking-level encryption and hides the real IP for hackers and scammers.

The iTop VPN provides you with more than 1700 global network servers for users to choose from. It also offers TCP, UDP, and HTTPS communication protocols and enables Kill switch automatically. In addition, iTop VPN protects against DNS attacks and provides a free IP scanning tool. iTop VPN can work on all Windows laptops and desktop PCs with its best features for any of the functions below:

What can iTop VPN do for you?

Some of the applications or simply the feature of iTop VPN are as follows.

Your data security and privacy protection

Let's start with the most common use of free Windows VPNs. The iTop VPN uses the advantage of adapting the security standards of the bank, meaning that your important information is encrypted and protected using the same technology as in the banking industry that banks use to protect their clients.

There will be no worry that hackers and swindlers will tamper with your private files over the network, and your shared information will no longer be disclosed to government agencies and organizations that collect and keep your information to limit your privacy and decisions.

Hiding your real location

By using iTop VPN, your ISP will not be able to locate your real IP as your real address, and your physical IP address will be encrypted and secured, and protected. Therefore, the ISP will not capture your data package and monitor your online activities, which can be sold to large companies through their accurate delivery of ads. You can also prevent potential bullies by hiding your real address when you use the Internet.

Access to online content not available in your region

The geo ban is not new to the world today. For example, you cannot watch HBO Now if you are not a U.S. citizen. Also, as we have said, the Netflix library is different in different countries (the US has more than 4000 movies and India only 2500). All these types of problems can be solved using the iTop VPN.

Also, iTop VPN can access BBC iPlayer, Disney Plus, Hulu, HBO Max, Paramount Plus, and Peacock streaming.

Other than this, iTop VPN can unblock various famous social media handles. For example, iTop VPN can unblock WhatsApp, Telegram, Skype, Facebook, Twitter, and more.

The iTop VPN provides tunnels dedicated to different uses. All user areas are taken from developer concerns. Online video streaming, social media, and online playback are offered as options for violating the geo limit. In addition, iTop VPN has dedicated VPN servers to unblock popular games like PUBG, Roblox, and Call of Duty Warzone and fix high ping problems.

What can iTop VPN bring to you while others may not?

Browser Cleaner

Benefiting from the PC optimizing software upgrade experience, iTop utilizes the unparalleled benefits of increasing the performance and security of your internet browser. The iTop browser cleaning features not only clear your browser history but thoroughly clean your temporary files so hackers and others can't access your personal information by analyzing temporary data packets on your computer.

Also, any piece of data that may disclose your identity will be encrypted and protected using iTop VPN for free. Thus, iTop VPN checks and clears privacy issues to prevent private data from being hacked.

Ads Blocker

The internet is now making a huge amount of money. As a result, hundreds and thousands of technology companies and entrepreneurs crave your personal information and can't wait to dig into your consumption data for their interests in their business. By clicking on Ads, A.I., the algorithm will get positive and negative feedback, and your private profile and customer image will be created.

More advertising will come with the information they get from you. The iTop VPN AdBlocker will block online ads as a way to protect your privacy and reduce the risk of criminal websites stealing sensitive information and NSFW content, keeping all of these annoying ads away from your screen.

Free to Use

iTop VPN is a free VPN for Windows operating system. Unlike other VPNs, you will need to sign up for their monthly service plan with your banking details (purchases will generate as soon as the so-called "Free Trial" is terminated, and payment will be transferred). iTop VPN is an entirely Free Windows VPN as you don't have to provide any of your personal monetary information to use this VPN for free.

It has 700 megabytes of data per day for free users and is reset daily. If you are a heavyweight user who wants to visit websites privately or play online games across the region, iTop VPN is the best free VPN for you. There are other features that iTop offers: 1800+ IP servers in 100+ locations, dedicated VPN servers to unblock popular streaming, games and social networks, 1000 more servers, 100 server locations, Clean and intuitive interface with easy-to-find features, Safe Enforcer, Kill switch, Smart Location, 5 top connections and much more.

If you need unlimited access to the data, you can subscribe to the premium plan and use iTopVPN without any data limit. The monthly plan starts at \$11.99. However, as a part of the summer sale, you can subscribe to the yearly plan and get a 70% discount. Finally, you need to pay only \$3.58 per month, billed annually at \$42.99.

Conclusion

Of course, there are many options for Windows VPNs on the market, but if you are looking for a free Windows VPN, that does not ask for credit card details. Whether looking for another portable VPN to transfer some important files or to visit a particular private website, iTop VPN may be the best and most reliable choice for real free VPNs on Windows. I would highly recommend you give it a try, see if you need a VPN for your work and your life, and then make some choices of your own.
