In brief

DEN is one of India's largest Broadband service providers and provides a couple of the best broadband plans. Here we are listing den broadband plans Kerala pricing and validity.

DEN is one of India's largest Broadband service providers and provides a couple of the best broadband plans. Here we are listing den broadband plans Kerala pricing and validity. It is also to be noted that Reliance Jio bought some shares of DEN. However, it is not a complete acquiring.

Currently, the cable service of DEN is providing Jio Set Top Box to its customers. However, the broadband service is entirely under DEN branding, and currently, the company is not using Jio's Hardware like WiFi Router and ONU/ONT devices.

Earlier, we reported the issues faced by the DEN customers during the lockdown due to the massive usage. But all those issues are now resolved, and the company is providing the best service now.

How to Get Den Broadband Connection

Den Broadband connection is now available in almost all the cities and even in rural areas. However, the company is giving direct connection only to selected cities in the North Indian States. In all other areas, Den is offering broadband connection with the help of Local Cable Operators (LCO).

If you wish to take Den Broadband Connection, you can contact Den Customer Care Number: +1800-419-2020. Alternatively, you can contact your local cable operator to check whether they offer Den Connection in your area.

I am using Den Broadband for the past 5 years, and in my experience, Den offers the best and reliable internet connection. But when I am staying the best and reliable, it is all subjective. The fact is that each service is evaluated based on its service and performance, and it may vary from region and time. In our area, Den Internet Connection is managed by the LCO, and they offer the best service all the time.

Even during any service disruption, they act promptly and tries to fix them ASAP. So we can say that if the service provider in your area is good enough to manage effectively, you won't face any issues. That is why some people say Den is excellent in speed and service, whereas some others say just opposite. If you're a DEN customer and you want to know if your broadband currently has issues, you can check your broadband speed using any speed testing tool.

Here we are listing all the available broadband plans that DEN is offering to its customers.
