In brief

Having an Android TV box or Android TV stick is not a big deal these days. However, an Android TV stick or an Android TV Box with the latest Android 10 update is great.

Having an Android TV box or Android TV stick is not a big deal these days. However, an Android TV stick or an Android TV Box with the latest Android 10 update is great. When we speak about the latest Android version, we are not saying Android 10 is the newest version, but when it comes to streaming devices. Android 10 is something latest.

Today, most streaming devices come with the Android 9 out of the box. However, some new products are already bundled with Android 10. Motorola DVM4KA01 streaming device was one such device released in 2021 with Android 9 out of the box.

Android 10 Update For Motorola Android TV

Now, the streaming stick from Motorola received the Android 10 update and is available to all users. The new update brings some security updates and a major OS upgrade, which supports new apps and games. However, you might not see any visual changes with the latest Android 10 on Motorola Android Stick.

How to update Motorola DVM4KA01 to Android 10

Most probably, you might see a notification saying System update Available on the home screen. If so, click on that, and you will see the download page, where you can download and install the OTA update. If the notification is not available on the home screen, you can manually search and install the update from the System Update section.

It will take some time to download and install the update. Once done, your Motorola DVM4KA01 will get updated to the latest android 10 version.

What makes Motorola DVM4KA01 one of the Best Streaming Device

Motorola DVM4KA01 is an Android stick that can be compared with Amazon Fire Stick. Both the Amazon Fire TV stick and Motorola Stick has their importance. However, what makes Motorola Shines is its storage and memory. Most streaming sticks come with 1 GB RAM, whereas Motorola Stick comes with 2GB RAM, making the device respond faster.

Another highlight is its storage; Motorola Stick comes with a generous 16GB storage, whereas most other devices have an 8GB storage capacity. With Moto Stick, you can install more apps and games, which is impossible with other devices.

Conclusion

Apart from the specs and details, Motorola Stick is a great device that can be considered the alternative for FireTV Stick if you wish to have more storage and memory. So, you can install many apps and games on your device and experience the Android 10 features on your streaming device.
