In brief

myMail is one of the best email application available in play store, which can be used as a default Email App for accessing your email. It supports almost all the email services and you can use all the email in single application.

myMail is one of the best email application available in play store, which can be used as a default Email App for accessing your email. It supports almost all the email services and you can use all the email in single application. The application is simple and with an attractive UI too. The major highlight of the application is the easy of configure and use.

It does not need too much complication such as host connect and port settings. Just click on the service and enter your email and password, and Login only at a beginning, it will simply connect to the service and automatically connected to the account. Messages will be synced automatically and you will be notified soon when you get a new email by its Real-time push notifications.

myMail supports all popular email services including

- Google Mail (Gmail, Google Apps for Business and Education)
- Microsoft (Hotmail, MSN mail, MS Outlook, Office 365 and Live)
- Yahoo mail (previously, ymail)
- AOL
- GMX
- Mail.com
- Apple (iCloud, me.com, mac.com)
- My Mail mobile email (my.com)
- Custom emails of your website.

myMail automatically sets up IMAP, POP and SMTP settings for most host domains and includes support for the majority of corporate email servers such as Lotus Notes and Microsoft Exchange where IMAP and SMTP are enabled.
