In brief

Looking to play PUBG on your PC or even to play with the popular Pokemon Go on your desktop, then Nox App Player is the best choice.

Looking to play PUBG on your PC or even to play with the popular Pokemon Go on your desktop, then Nox App Player is the best choice.

NoxPlayer is an android emulator for PC which will help you to run popular Android apps and games which is available to download since the popularity of Android has gained a lot from the past years. More and more apps are now available in the Playstore. At some point, you might have thought of running those apps on your desktop right. Here the use of emulators comes.

Here we have a good option to install and run any Android App or Game on your PC, the Nox App Player. Nox APP Player target to provide the best experience for users to play android games and apps on PC. Install your favorite apps like Facebook, Whatsapp, Telegram etc on your PC.

Even if we have BlueStacks and Andy, which were available earlier to run android application on PC, the Nox App Player will be the best alternative for all these. Those who have used BlueStacks may find some problem using that even in performance and user experiences.

Nox App Player doesn't have such issues. The app will not use much space from your hard disk so that you won't have to worry about storage. And also, this application doesn't need much memory to run, which makes them feel that you are using an Android itself, not an emulator.

One another feature of the application is that you can copy files from your Nox App Player to your PC by just dragging it as like transferring files from folders within the PC. Now, try Nox App Player and enjoy your favorite Android Apps and Games on your PC. Before you start with the games on Nox Player, please check the tutorial provided by Nox with keyboard shortcuts.

It so to be noted that the latest version of Nox Player is version 6.6, which is based on Android 7 Nougat, which means some of the latest apps or games only support higher versions like Android 8 Oreo, Android 9 Pie, and the latest Android 10 will not run on Nox Player. However, it will help you to run all the apps that do support Android 7 or less.
