Bottom line

Of late, you can find several hosting providers for your website available in the market for the users worldwide. With so many options available, it becomes difficult to choose a reliable and genuine one for sure.

Of late, you can find several hosting providers for your website available in the market for the users worldwide. With so many options available, it becomes difficult to choose a reliable and genuine one for sure. Are you looking for a hosting provider for your site and not able to decide between Siteground and Bluehost? If yes is your answer, then we can help you here by comparing each other.

Bluehost is a reliable and established website hosting provider and known for providing full and strong services to users all around the world. Users' benefits such as WordPress integration, free domain, and better value for money are all part of Bluehost's genuine reputation. One of the best benefits of using Bluehost is its offers of a free domain name which attracts a lot of users. Also, it provides excellent customer support for fixing your problems or any issues.

It would be better for you to understand that the domain is not included in the money-back guarantee - Bluehost will only take a registration fee of \$15.99 from your refund. It means that the domain name is only yours and hosting service status does not matter. Even if you are canceling your plan with Bluehost, the domain will be available with you. If you are only looking for unlimited disk space and a free domain, then you should only go for the Bluehost without any second thought.

SiteGround web hosting offers various packages for web hosting, free domain names, 24/7 technical support and has 99.9% uptime. All the data centers are highly secured and full located throughout the world to provide perfect support. You should note that getting started with SiteGround is simple and easy to use for everyone. They take the help of an automatic activation system to manage your hosting easily without any issues at all. It offers various plans to meet your overall website hosting requirements, starting at just \$3.95 per month.

For the users who have some knowledge of starting their site and already dealt with hosting providers or looking for a more DIY option, then SiteGround offers reliable and affordable hosting with easy one-click integration of WordPress. It offers free auto daily backups, excellent customer support, fast uptime, and also recommended third by WordPress. The only downside is that you would not get a free domain and only limited disk space for your needs.

Conclusion

Bluehost is a better alternative than SiteGround as it offers better support, higher performance, and also easy to use for beginners. If you are looking for free auto daily backups for 30 days to restore your files, email, and websites, then you can try SiteGround without any second thought. Uptime is perfect for both. It is important because during downtime your site visitors will not be able to access your website. After all, it all depends on your needs. If backups are more important to you, then consider SiteGround else go for Bluehost for a free domain name and unlimited disk space right now!
