In brief

Smart DNS Proxy is one of the best and popular Smart DNS services available to users worldwide. It is perfect for smooth streaming without any issues at all.

Smart DNS Proxy is one of the best and popular Smart DNS services available to users worldwide. It is perfect for smooth streaming without any issues at all. It is a service that helps you in unlocking global music, videos, and website services.

You can easily unlock several services, which include ABC, WWE, Netflix, or any music streaming services such as Pandora and Spotify, no matter where you are staying on the earth. You would be glad by knowing that it is really faster than a VPN and works perfectly with any device such as PC, Mac, SmartTV, Routers, iPad, or any Android device.

Fast and Secure

Smart DNS Proxy has fast and secure DNS servers so that you would not face any issues while using it for sure. Make sure you are changing your DNS IP address on your Android device you are using to a Smart DNS Proxy IP address. By doing this, your DNS inquiries would be going through their fast DNS network.

Global servers

They have global servers so that you can stream any show you want anywhere if you are in Europe and want to stream Netflix the United States, then it is also possible with the Smart DNS Proxy.

Encryption

Smart DNS Proxy's VPN service gives access to the several encryption protocols which includes IKEv2, L2TP/IPSec and OpenVPN. Also, iOS provide access to L2TP/IPSec and IKEv2, which means that you are going to use a third-party client to connect via OpenVPN.

The encryption process is robust and secure for users. The availability of the .ovpn files means that any user can easily connect to its servers by using OpenVPN if they want. OpenVPN has standard default settings, which means that it is best for maintaining security and privacy purposes.

Pricing and plans

Smart DNS Proxy offers a generous 14-day free trial, and you do not have to give your personal or payment information for using it. If you are going for the Annual subscription, then you would get a 30-day money-back guarantee. After the expiry of the annual subscription, it would change to a regular monthly plan. It would be better for you to go for the 24-month plan, which is an affordable option at just \$2.08/month. The payment option is by Paypal and credit card.

Conclusion

At last, I would recommend everyone to go for Smart DNS Proxy as it is the professional Smart DNS company due to its affordable price, 24/7 support, and simple to use. If you are facing any issues at any time, then you can contact customer support, which is available via email and live chat. They would help you with answering and solving all your queries.

For more valuable information, you can visit the Smart DNS Proxy website, which is well designed and easy to navigate for the users. You would find relevant information about the service for sure. They maintain their social networks up to date with the latest information about the services as well as TV series and steaming related updates.
