In brief

Are you looking for a best and cheap live tv service for your mobile, desktop or even tablet, then YuppTV is the best choice. Many of you have already heard of this, but here I will let you know in detail about the service.

Are you looking for a best and cheap live tv service for your mobile, desktop or even tablet, then YuppTV is the best choice. Many of you have already heard of this, but here I will let you know in detail about the service. I am using this for the past few months, and I will let you know my experience in this article.

First of all, the YuppTV app is an OTT (Over The Top) service, which provides Live TV, Movies, etc. The company started its use in the United States in the vision of offering Live Indian TV channels to all the Indians there over the Internet. At the time, most of the Indian channels were not available there on the cable network, and even they were expensive too. YuppTV then provided cheap Internet TV service to all the Indians living there with Movies, Catch UP Tv, etc.

Catch UP TV is the service provided by YuppTV, which lets you watch all the previous programs for each channel at any time you need. The service will keep the programs for up to 7 days. So all the last seven days programs you can watch later on your convenience. This feature is much helpful for those who miss some programs. YuppTV mainly focuses on South Indian Channels. You will also get Hindi and English Programs too.

Now, YuppTV offering its service in more regions including India, Australia, Canada, Europe, Fiji, Guyana, Japan, Kenya, Malaysia, Mauritius, Middle East, New Zealand, Nigeria, Qatar, Africa, Saudi Arabia, Singapore, South Africa, Trinidad and Tobago, United Arab Emirates, United Kingdom, etc. Each area has a different channel package and rates.

Recently YuppTV started its service in India too with a selected number of channels, and you can watch all at a rate of Rs.99 per month or if you need to watch it for only one day. It will be available for Rs.5 and one week; it will be for Rs. 30.

I am using this service in the UAE for the last few months, and I am pretty happy with it. Their service is optimized for the Internet connection, and the channel streams are coming from multiple streaming servers. So it will automatically stream the content according to your internet speed.

You will be getting High Quality if you are in decent Internet speed, and for slow speed, it will stream from the low-quality streaming server. But from my experience, if you are using 1mbps or 2mbps internet connection, you will get a High-Quality video.

As I mentioned above, all their channels are High-Quality ones. So if you stream the media on your TV using Chromecast, fire tv stick, or any other streaming device, you will be getting High Quality, it is even better than Cable TV channels. YuppTV is also having there on TV channels for movies like BBO, MBO, TBO, etc.

Another best thing is its attractive packages. You can choose from there different packages, like Hindi, Malayalam, Tamil, Kannada, Telugu, etc. And now, with all the packages, they are providing YuppFlix for free. YuppFlix is their Streaming service where you can watch unlimited movies, TV, Shows, etc. It is like Hotstar, Netflix, Prime Video, etc. We will see that in detail later.

One important thing I missed is their support. From my experience, YuppTV's support was excellent. The live help will be available 24x7 via phone and chat. You can contact them via calling them or can chat from the website if anything is needed, and they will help you. The support team is understandable, and they will fix your issues in no time.

Some Pros and Cons of YuppTV

Pros

- 1. Lot of Live TV Channels
- 2. All the channels are in High QQuality
- 3. No Downtime
- 4. Optimized to perform in different internet speed
- 5. Attractive packages
- 6. Good customer support
- 7. Watch on Android, IOS, Desktop etc
- 8. Chromecast support

Cons

- 1. No HD channels available
- 2. No sports channel availble
- 3. Geo restriction - If you purchase a package from UAE, USA, or any other country, you cannot use that if you go to another country. You have to get a separate package for that country. It is one thing that I don't like. If you are a frequent traveler or you go to another country on vacation, you cannot use your subscription. YuppTV should consider this matter, and will be better if they make it like Netflix or Prime Videos, in which they will use the same subscription for all the countries, but the content will only change. Anyway, other than this, the service is good and i recommend you to try it before taking a subscription.
